GLOBAL X Covered Call ETFs

by Mirae Asset

Why invest in Covered Call ETFs?

Global X's actively managed covered call ETFs offer investors exposure to a portfolio of key benchmarks, asset classes and sectors and are designed to provide regular distributions, the opportunity for capital appreciation and lower volatility than would otherwise be experienced by holding the same portfolio of equities directly. By using a covered call strategy, investors can draw on three main sources of potential total return for the fund: (i) premiums earned from writing call options (ii) dividend income from the portfolio; and (iii) capital appreciation of the underlying equities in the portfolio. The goal of these ETFs is to provide upside return potential of the underlying securities in the portfolio while delivering an attractive source of monthly income.

By investing in a Global X covered call ETF, you can access institutional option pricing and expert trading execution all in a convenient ETF structure.

Income: Covered Call ETFs offer the prospect of income from call option premiums on securities that typically pay little to any dividends.

Actively Managed: Harness the benefits of active management provided by an experienced options management team.

Leveraging Volatility: Covered Call ETFs can potentially generate higher yields in volatile market conditions while exhibiting less volatility than the broader market.

Over \$3.1 Billion CAD*

Total Assets Under Management (AUM) of all Covered Call ETFs

DEFINITION OF TERMS

Annualized Distribution Yield: The most recent regular distribution (excluding additional year-end distributions) annualized for frequency, divided by Net Asset Value (NAV) as at February 28, 2025.

12-Month Trailing Yield: The yield an investor would have received if they had held the ETF over the last twelve months stated as a percentage of the net asset value per unit on the last business day of the most recent month-end. The 12-Month Trailing Yields are inclusive of the previous portfolios.

Percent Written: The percentage of options the ETF is short out of the entire portfolio per each covered call ETF at the beginning of the last business day of the most recent month-end.

Percent OTM: Represents the weighted average OTM percentage of the calls for the month for each security when written. The OTM percentage per option is calculated based on the percentage difference between the strike price and the closing price for each security at the end of the day.

% OTM at Month-End: Represents the percentage of the options each ETF held at the beginning of the last business day of the most recent month-end that is OTM. (For example, if we have 10 options open at the end of the month and 8 are OTM then the number would be 80%).

Standard Deviation: Is a measure of the risk that an investment will fluctuate from its expected return. The smaller an investment's standard deviation, the less volatile it is. The larger the standard deviation, the more dispersed those returns are, and thus the riskier the investment is. Historical volatility may not be indicative of future volatility. Annualized standard deviation is based on historical daily total returns since inception.

INDEX

Global X S&P/TSX 60 Covered Call ETF (CNCC)

Generate Monthly Income from Canada's Largest Companies

CNCC seeks to provide: (a) exposure to the performance of the large-cap segment of the Canadian equity market; and (b) monthly distributions of dividend and call option income. To mitigate downside risk and generate income, CNCC will employ a dynamic covered call option writing program.

9.70%

Global X Enhanced S&P/TSX 60 Covered Call ETF (CNCL)

Magnified Growth Potential + Enhanced Monthly Income from Canada's Largest Companies

CNCL seeks to provide, to the extent reasonably possible and net of expenses: (a) exposure to the performance of the large-cap market segment of the Canadian equity market; and (b) high monthly distributions of dividend and call option income. To generate income, CNCL will be exposed to a dynamic covered call option writing program. CNCL will also employ leverage (not to exceed the limits on use of leverage described under "Investment Strategies" in the ETFs prospectus) through cash borrowing and will generally endeavour to maintain a leverage ratio of approximately 125%.

11.97%

Global X S&P 500 Covered Call ETF (USCC/USCC.U²)

Generate Monthly Income from the United States' Largest Companies

USCC/USCC.U seeks to provide: (a) exposure to the performance of the large-cap market segment of the U.S. equity market and (b) monthly U.S. dollar distributions of dividend and call option income. To mitigate downside risk and generate income, USCC.U will employ a dynamic covered call option writing program. USCC will not seek to hedge its exposure to the U.S. dollar back to the Canadian dollar.

Global X All-Equity Asset Allocation Covered Call ETF (EQCC³)

Monthly Income from a globally diversified All-Equity portfolio

EQCC seeks to provide a combination of a high level of income and long-term capital growth, primarily by investing in exchange traded funds that provide exposure to a globally diversified portfolio of equity securities. To generate premiums, EQCC will be exposed to a dynamic covered call options writing program.

N/A

Global X Enhanced All-Equity Asset Allocation Covered Call ETF (EQCL)

Magnified Growth Potential + Enhanced Monthly Income from an all-equity portfolio

EQCL seeks to provide a combination of a high level of income and long-term capital growth, primarily by investing, directly or indirectly, in exchange traded funds that provide exposure to a globally diversified portfolio of equity securities. To generate premiums, EQCL will be exposed to a dynamic covered call option writing program. EQCL will also employ leverage (not to exceed the limits on use of leverage described under "Investment Strategies") through cash borrowing and will generally endeavour to maintain a leverage ratio of approximately 125%.

11.95%

FIXED INCOME

Global X Short-Term U.S. Treasury Premium Yield ETF (SPAY/SPAY.U²)

High Monthly Income from U.S. Treasuries, targeting a duration of less than 3 years

SPAY/SPAY.U seeks to provide: (a) exposure to the performance of a portfolio of U.S. Treasury securities, generally targeting a duration less than 3 years; and (b) high monthly distributions of interest income and option premiums. To generate premiums and reduce volatility, SPAY.U will employ a dynamic option program.

¹The most recent regular distribution (excluding additional year end distributions) annualized for frequency, divided by current net asset value (NAV) per security as at February 28, 2025. ²Trades in U.S. dollars. ³Distributions for the Global X S&P 500 Covered Call ETF are declared and paid in U.S. dollars, including those listed under the Canadian dollar-traded ticker USCC. The approximate Canadian dollar equivalent distribution rate for USCC is \$0.17271 per security. For securityholders who hold the Canadian dollar-traded USCC, the securityholder's account holder will typically convert distribution payments to Canadian dollars. ⁴Distributions for Global X Short-Term U.S. Treasury Premium Yield ETF, Global X Mid-Term U.S. Treasury Premium Yield ETF and Global X Long-Term U.S. Treasury Premium Yield ETF are declared and paid in U.S. dollars, including those listed under the Canadian dollar-traded ticker SPAY, MPAY and LPAY. The approximate Canadian dollar equivalent distribution rate for SPAY is \$0.17991 per security, for MPAY is \$0.21589 per security and for LPAY is \$0.25187 per security. For security holders who hold the Canadian dollar-traded ticker, SPAY, MPAY and LPAY, the securityholder's account holder will typically convert distribution payments to Canadian dollars. ⁵Investment fund regulations restrict the presentation of performance figures until a fund reaches its one-year anniversary.

DISCLAIMER

Effective June 24, 2022, the investment objectives of the Global X S&P/TSX 60 Covered Call ETF ("CNCC") (formerly Horizons Canadian Large Cap Equity Covered Call ETF), the Global X Canadian Oil and Gas Equity Covered Call ETF ("ENCC") (formerly Horizons Canadian Oil and Gas Equity Covered Call ETF), the Global X Equal Weight Canadian Bank Covered Call ETF ("BKCC") (formerly Horizons Equal Weight Canadian Bank Covered Call ETF), the Global X S&P 500 Covered Call ETF ("USCC.U, USCC") (formerly Horizons US Large Cap Equity Covered Call ETF), the Global X NASDAQ-100 Covered Call ETF ("QQCC") (formerly Horizons NASDAQ-100 Covered Call ETF), and the Global X Gold Producer Equity Covered Call ETF ("GLCC") (formerly Horizons Gold Producer Equity Covered Call ETF), were changed following receipt of the required unitholder and regulatory approvals, to seek to provide exposure to the ETFs' underlying equity portfolios and to employ a dynamic covered call option writing program. Previously, the ETFs sought exposure to an underlying equal-weight equity portfolio and generally wrote covered call options on 100% of portfolio securities. The new tickers began trading on the TSX on June 27, 2022. For more information, please refer to the disclosure documents of the ETFs on www.GlobalX.ca.

Commissions, management fees, and expenses all may be associated with an investment in products (the "Global X Funds") managed by Global X Investments Canada Inc. The Global X Funds are not guaranteed, their values change frequently and past performance may not be repeated. Certain Global X Funds may have exposure to leveraged investment techniques that magnify gains and losses which may result in greater volatility in value and could be subject to aggressive investment risk and price volatility risk. Such risks are described in the prospectus. The prospectus contains important detailed information about the Global X Funds. **Please read the relevant prospectus before investing.**

BKCL, CNCL, USCL, EQCL, ENCL, EMCL, EACL and QQCL (or the "Enhanced ETFs") are alternative mutual funds within the meaning of NI 81-102, and are permitted to use strategies generally prohibited by conventional mutual funds, such as the ability to invest more than 10% of the Enhanced ETF's net asset value in securities of a single issuer, the ability to borrow cash and to employ leverage. While these strategies will only be used in accordance with the applicable investment objectives and strategies of the Enhanced ETFs, during certain market conditions they may accelerate the risk that an investment in Units of such Enhanced ETF decreases in value.

The payment of distributions, if any, is not guaranteed and may fluctuate at any time. The payment of distributions should not be confused with an Exchange Traded Fund's ("ETF") performance, rate of return, or yield. If distributions paid by the ETF are greater than the performance of the ETF, distributions paid may include a return of capital and an investor's original investment will decrease. A return of capital is not taxable to the investor, but will generally reduce the adjusted cost base of the securities held for tax purposes. Distributions are paid as a result of capital gains realized by an ETF, and income and dividends earned by an ETF are taxable to the investor in the year they are paid. The investor's adjusted cost base will be reduced by the amount of any returns of capital. If the investor's adjusted cost base goes below zero, investors will realize capital gains equal to the amount below zero. Future distribution dates may be amended at any time. To recognize that these distributions have been allocated to investors for tax purposes the amounts of these distributions should be added to the adjusted cost base of the units held. The characterization of distributions, if any, for tax purposes, (such as dividends/other income/capital gains, etc.) will not be known for certain until after the ETF's tax year-end. Therefore, investors will be informed of the tax characterization after year-end and not with each distribution if any. For tax purposes, these amounts will be reported annually by brokers on official tax statements. Please refer to the applicable ETF distribution policy in the prospectus for more information.
