Source: Global X Investments Canada Inc. as at June 30, 2025. | ¹Plus applicable sales tax. | ²Trades in U.S. dollars. | ³The most recent regular distribution (excluding additional year-end distributions) annualized for frequency, divided by Net Asset Value (NAV) as at June 30, 2025. | ⁴Weighted Average Duration is average duration of the underlying funds in the portfolio or an index, as applicable, weighted by the relative size of each bond in that portfolio or index. Duration is a measure of the responsiveness of a bond's price to changes in interest rates and the Weighted Average Duration of a portfolio or index, as applicable, is a measure of the responsiveness of that portfolio in index to changes in interest rates. Bond prices generally move inversely to interest rates.

A Different Approach to Income Generation

While equity markets benefit from an inherent upward drift due to economic growth and capital appreciation, interest rate movements are primarily dictated by monetary policy cycles and macroeconomic factors. As such, interest rates do not exhibit a consistent upward trend over time as equities do, making equity-based strategies like covered calls less suitable for fixed-income investments.

In the fixed-income space, where interest rates are equally likely to decline as they are to rise, a more nuanced approach to income generation is required. This involves complementing "selling upside" (call options) with "selling downside" (put options).

U.S. Government 30-Year Yield

Source: Bloomberg, as at June 30, 2025.

While selling call options aligns with the traditional income-generation approach by monetizing potential price stability or slight upward movement, adding the sale of put options broadens the strategy.

This dual-sided approach, referred to as the "premium yield" strategy, combines selling both puts and calls, offers a versatile and effective approach. Unlike more static strategies, the premium yield approach thrives in various market conditions, whether rates are rising, falling, or remaining range-bound.

Descriptions at a Glance

Global X Short-Term Government Bond Premium Yield ETF (PAYS)

PAYS seeks to provide: (a) exposure to the performance of government debt securities, primarily issued by the Government of Canada, generally targeting a duration less than 3 years; and (b) high monthly distributions of interest income and option premiums. To generate premiums and reduce volatility, PAYS will employ a dynamic option program. PAYS seeks to hedge any foreign currency exposure back to the Canadian dollar.

Global X Short-Term U.S. Treasury Premium Yield ETF (SPAY/SPAY.U)

SPAY seeks to provide: (a) exposure to the performance of a portfolio of U.S. Treasury securities, generally targeting a duration less than 3 years; and (b) high monthly distributions of interest income and option premiums. To generate premiums and reduce volatility, SPAY will employ a dynamic option program.

Global X Mid-Term U.S. Treasury Premium Yield ETF (MPAY/MPAY.U)

MPAY seeks to provide: (a) exposure to the performance of a portfolio of U.S. Treasury securities, generally targeting a duration between 5 and 10 years; and (b) high monthly distributions of interest income and option premiums. To generate premiums and reduce volatility, MPAY will employ a dynamic option program.

Global X Long-Term U.S. Treasury Premium Yield ETF (LPAY/LPAY.U)

LPAY seeks to provide: (a) exposure to the performance of a portfolio of U.S. Treasury securities, generally targeting a duration over 10 years; and (b) high monthly distributions of interest income and option premiums. To generate premiums and reduce volatility, LPAY will employ a dynamic option program.

Global X Mid-Term Government Bond Premium Yield ETF (PAYM)

PAYM seeks to provide: (a) exposure to the performance of government debt securities, primarily issued by the Government of Canada, generally targeting a duration between five and ten years; and (b) high monthly distributions of interest income and option premiums. To generate premiums and reduce volatility, PAYM will employ a dynamic option program. PAYM seeks to hedge any foreign currency exposure back to the Canadian dollar.

Global X Long-Term Government Bond Premium Yield ETF (PAYL)

PAYL seeks to provide: (a) exposure to the performance of government debt securities, primarily issued by the Government of Canada, generally targeting a duration over ten years; and (b) high monthly distributions of interest income and option premiums. To generate premiums and reduce volatility, PAYL will employ a dynamic option program. PAYL seeks to hedge any foreign currency exposure back to the Canadian dollar.

DISCLAIMERS

Commissions, management fees, and expenses all may be associated with an investment in products (the "Global X Funds") managed by Global X Investments Canada Inc. The Global X Funds are not guaranteed, their values change frequently and past performance may not be repeated. Certain Global X Funds may have exposure to leveraged investment techniques that magnify gains and losses which may result in greater volatility in value and could be subject to aggressive investment risk and price volatility risk. Such risks are described in the prospectus. The Global X Money Market Funds are not covered by the Canada Deposit Insurance Corporation, the Federal Deposit Insurance Corporation, or any other government deposit insurer. There can be no assurances that the money market fund will be able to maintain its net asset value per security at a constant amount or that the full amount of your investment in the Funds will be returned to you. Past performance may not be repeated. The prospectus contains important detailed information about the Global X Funds. **Please read the relevant prospectus before investing.**
